Drilling Experts

Darrin Martini, President

Established in 2000, Martini Drilling Corporation has become the one stop solution for

your company's Geotechnical and environmental drilling needs.

Since its inception, Martini Drilling Corporation has earned a reputation for high quality and outstanding service.

Our employees are trained and qualified to do the job right! They are medically monitored and hold current Cal OSHA 40 Hour Hazardous Waste Training Certificates and maintain 8 hour refresher courses each year. They have earned RSO Safety Overview Certificates for L.A. County Refinery Work, Rail Safety Certification and Chevron Refinery Safety Certificates.

Geotechnical Drilling

Investigates the stability, classification, and change of soil type as a function of depth and location. It can also be used to define groundwater depth, movement and location and its impact on the soil.

Environmental Drilling

Determines the existence of contamination in soil or groundwater. Samples of soil and groundwater are recovered evaluated and monitored for any contamination impacting the environment.

LPS Certified • AQMD Certified Rigs

Our fleet on impeccably maintained equipment insures the highest level of accuracy and quality for your environmental and geotechnical drilling projects.

CME 75 Diesel HT

Martini Drilling Corp. owns and operates 3 CME-75 Diesel HT drilling rigs. The CME 75 has earned a reputation second to none for outstanding performance and reliability. The CME 75 is capable of hitting depths up to 150 feet and is small enough to be able to work around your active job site without disrupting daily operations.

Geoprobe 6600

Martini Drilling Corporation has added the finest piece of equipment in the industry for your direct push drilling needs. The Geoprobe 6600 offers direct push capability to 75 feet bgs with Macro Core or Dual Tube sampling capability for continuous or discrete soil sampling. We also install small diameter water and vapor wells.

Vacmaster System 4000

This is the world's most powerful Air-Vacuum Excavation System. It will allow you to pothole using air in the most difficult soils 95% of the time, while still having water available as a back-up. Its fast-acting interceptor canister allows you to keep dry and wet spoils separate. The SYSTEM 4000 represents the state-of-the-art in Air-Vacuum Excavation Systems for underground utility locating
